## Traditional Payment Process

Server walks away.

Guest reviews bill and places credit card in billfold.

 Guest waits impatiently for server to return.

Server returns to retrieve billfold with credit card and bill.

Server walks to the POS station to process the payment.

Guest waits impatiently for server to return.

Server returns with the receipt.

Guest inputs tip amount and signs receipt.

Guest leaves.

Server comes back to the table to retrieve billfold with signed receipt.

Server takes receipt and enters tip adjust at POS system.

## vs. with SkyTab

 Server takes the final bill to the guest along with the payment device.

 Guest reviews the bill and and enters the tip amount on the payment device.

Cuest inserts the card, receipt is printed.

Guest has option to rate dining experience, or.....

Guest leaves.

- · Turn tables faster, more guests served per night
- Increase average guest spend amount, reorders sent right from the table
- Increase servers tips & employee retention. (Higher check = Higher tips, more guests served = Higher tips, better guest satisfaction = Higher Tips
- Guest don't have to play the "Wait For The Guest Check Twice" routine
- Email Receipts, & capture guests email address for marketing
- Prevent negative reviews on social media by guests, if given a low STAR rating, your mgr-on-duty receives IMMEDIATE TEXT, allowing them to speak to guest before guest leaves.
